This directory is designed to assist you in providing additional information when only a telephone number is available. Telephone numbers are arranged in numerical sequence from the lowest number to the highest number. With this system, it takes the "guess work" out of who called, blind numbers in advertising or any other situation where only the phone number is given. This guide includes all phone numbers in the county.

The DIGITAL MAPPING SYSTEM

Farm and Home Publishers Ltd. is pleased to introduce our "new look" plat and directory book. In our never ending effort to produce the best and most accurate plat and directory books, Farm & Home Publishers has invested countless hours of research and development in the areas of G.I.S. and digital cartography. The result of these efforts is the book you are now reading. By using computerized drafting, digital imagery and our own extensive informational updating procedure, we are able to combine data from several sources, including: County or Township Assessor's office, State Dept. of Transportation or Dept. of Highways, E 911 systems and our own census takers. The data is maintained on a computer system in database and line drawing/drafting formats. Since the data is computerized by category or level, we can update and/or manipulate the data on a single level, such as primary paved roads, then combine it with other levels, such as hydrology or land ownership. When we combine certain levels, we are able to produce the easy to read Township plat maps you see in this book. If we combine other levels, we produce the county map page or the Township directory pages. The geographic information in this book has been calibrated to fit the USGS quadrangle system so it is consistent with many other G.I.S. systems in use today. With digital data, we are able to rescale maps to virtually any size, including 36 or 50 inch wall maps. We are also able to change linestyles or line "dominance" very easily to better show or enhance particular information. We hope you take a few minutes to observe some of these attributes in your plat & directory booklet, we feel that you will find every page easy to read and professionally printed.
